

ComfortTrack™ Material

Made Exclusively For Clear Aligners

Made exclusively for clear aligners, this revolutionary material's elastomeric properties generate an ideal initial force and maintain it over time.

The result? Superior patient comfort and more effective aligners.

COMFORTTRACK™ MATERIAL VS. OTHER CLEAR ALIGNER MATERIALS

*Force Retention at 37 Degrees Celsius

Compared to standard aligner plastics, ComfortTrack's multi-layered structure:

- > Generates 40% less initial force for reduced patient pain
- > Retains 150+% greater force on day 7

You'll feel the difference, and your patients will too.

EXCLUSIVELY FROM GREAT LAKES DENTAL TECHNOLOGIES

- > Item # 021-130
- > .76mm/125mm - Round
- > 10 Sheets/box
